

Optional Chip Minimizer treatment for Sink Cut-Outs

*detail may not represent your sink selection and does not apply to an Overmount/Drop in selection

Default EASED edge in sink cut-outs and against Appliances

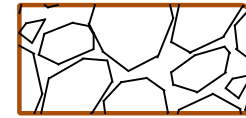

Sealing Information:

Granite, Marbles, Quartzites & Travertine: We will apply a high quality Sealer. Sealers are used in order to dramatically reduce the rate of absorbancy of a stone so it doesn't absorb stains as quickly, however this does not protect from scratching and etching. Homeowner should exercise care when using natural stone countertops.

Soapstone: We apply a fragrance free/Non-VOC enhancer made of all-natural plant oils and wax to bring out the natural colors and veining of soapstone. Additional applications are needed by homeowner 2 weeks after and periodically depending on usage of countertops.

Quartz (Engineered Stone): Sealing is not necessary.

Edge Profiles

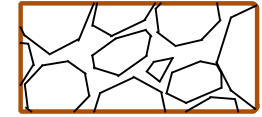

Quarter Round

Pencil Around
(also known as Double Bullnose/Radius)

Half Bullnose

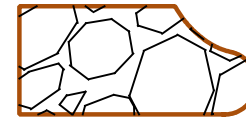

Eased/Standard
(Default Sink Cut-Out Edge)

Ogee

Demi Bullnose

Ogee Bullnose

Dupont

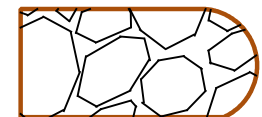

Quarter Bevel

Cove Ogee
(also known as Double Ogee/Roman Ogee)

Triple Pencil

Full Bullnose
